Claim Rejections - 35 USC § 103

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach or make obvious the claimed electromagnetic lock, but particularly including first and second component on the "armature holder" and the "electromagnet holder" being positioned to become engaged when sufficient shear force is applied to cause the armature to move across the face of the electromagnet while it's energized, in combination with a pivotally-mounted "armature holder" with "spring means biasing the armature holder toward the first position" and "means on the armature holder engageable with the magnet holder for moving the armature holder to its second position whereby the armature contacts the electromagnet when the armature and the electromagnet are in alignment".

It's noted that USPN 4,487,439 to McFadden teaches components (43,44) on the "electromagnet" and the "armature" that are arranged to inherently engage when sufficient shear force is applied to cause the armature to move across the face of the electromagnet while it's energized. The reference also teaches a spring (76) on the armature to bias it towards a first position. Although the "armature" apparently contacts the electromagnet and/or electromagnet holder moving it toward the second position, the reference does not teach structure on an "armature holder" that is the same or

Art Unit: 3677

equivalent to that disclosed by Applicant. The prior art has been carefully considered but does not remedy the many various shortcomings in teaching.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
